P. I. MCANALLY, Manager.

In imitation of the fabled worm the editorial staff of the Chronicle have at last turned upon their tormentors. Having finally shouldered the fateful scraw, we have decreed that henceforth the vapors issuing from front page shall at least be odorous. In consequence of this we wish to announce that in future we shall print only such letters as our inclination or our space shall allow.

In view thereof we shall endeavor to have always a few editorial comments upon current topics, and we shall assume the usual responsibility of shaping the policy of our own publication. Politics have always been wisely eschewed by the "Chronicle" and will always continue to be so trusted. The question of "Prohibition," however, is a great deal beyond the ordinary scope of "Tinware, Grit, pinheads and the rest." In view of the seriousness of the issue, we wish to announce ourselves as strong supporters of the "Liquor Act." This will not deter us from publishing letters of reasonable length, providing they are to the point. Correspondents, however, must sometime expect editorial criticism. All correspondence to be addressed to the editor, with writer's signature (not necessarily for publication) attached.

### Here and There.

I should like to draw your attention to the following speech in the House of Commons:-

Mr. George Roberts (Labor Representative of Norwich) said:--"The drink question had been exaggerated out of all proportion--and it was extremely unfair to level a charge in this respect against any particular section of the community. If the Chamberlain of the Exchequer, instead of boasting himself with 'drunken' would go down and have a close talk with the working classes of the country he would do far more good. All they desired was to be taken into the confidence of the Government. At the present they were ill-informed as to the gravity and dimensions of the war."

Mr. Samuel Roberts (N. Sheffield), speaking as a director of an armament manufacturing firm, explained "that it had taken time to develop the additional plant required for turning out munitions of all kinds, and the expansion was only just beginning to turn out munitions. They had no complaint whatever to make of their workmen, and the thanks of the country was due to them for their patriotic efforts."

Again Mr. H. Bottomley says:--I have had an opportunity of seeing the enormous ant-hills of industry down the Clyde each worker doing his important bit towards bringing the world to its knees. The result of war which has to win victory in this great struggle, and I said to myself, "It's a damnable shame for any sensible man to get on a platform and say these men are shirkers and drunkards."

Have you noticed, Mr. Editor, that a speaker is generally able to prove his particular pet evil as being responsible for at least 50 to 90 per cent. of the crime of the world, if this was really fact how easy it would be to make this a perfect world free from all vice. Take the drink question, you know the ever platform that it is responsible for 90 per cent. of the crime. The other day I saw in a paper that a professor said that the love of pretty things shown in store windows was answerable for 50 per cent. of the crime, etc. So now if you do away with the drink and store windows (I don't think he meant those in Crossfield). You get according to their figures a viceless world, of course this seems easy and simple until you read another crank, the vegetarian, says do away with meat and 50 per cent. of crime, etc. Then there is the anti-war crowd, etc., etc., again, and hundreds more you can mention and with the same old arguments, so it is not really quite so simple a matter as it sounds. Then I forgot the French theory that women are answerable for all evils from the time of Adam. So it seems to me you must get a world made up of men only if you want a perfect world, but when all's said and done I prefer that the women should be left to us.

The Season for Hail Insurance is again on, and I can offer to the Farmers the best protection in the largest Co.'s in the world. Choose the best at the same price as the rest. See me for particulars. Only 6 per cent. Exclusive Agents the Home Insurance Co.

Chas. Hultgren, Agent.

## Pain In the Side, Chest, or Back Aching Muscles Cured Quickly

**Even Doctors Marvel at the Penetrating Power of Good Old "Nervline"**

Pains anywhere—in the chest, neck, side, back, or muscles—they are always discomforting.

If the inflammation is severe, the pain will be intense. If allowed to continue, complications will follow.

Physicians say one of the best remedies for all kinds of aches and pains, because it penetrates through the sore tissues, carrying healing properties that destroy every symptom of pain.

In case of colds, sore chest and pleurisy, there should be a good rub-down with Nervline, and, of course, to relieve trouble in the head, it is advisable to put on a Nervline Porous

**Thankful For Ignorance**

Of a certain bishop following an anecdote is told:

When present over a conference a previous bishop had made his rounds within the comprise town of folks, to whom "the land question was a burning issue." He was greatly attacking, during the national importance of increasing our homegrown supply of food. The impression would be greater, if the church were not so little understood.

"Well, yes," was the answer, "you can tell that if you want to." said the primate, in sweet and musical tones: "all I have to say is that Mr. X— has much to thank for!"

### SICKLY CHILDREN PROMPTLY CURED

Baby's Own Tablets are an ideal medicine for little ones. They regulate the bowels and stomach and promote care circulation. Indigestion, colds, grippe, constipation, worms, cure colic and give baby health and happiness. Concerning this Dr. Fred. Williams, of Willow-Ont., writes: "I have used Baby's Own Tablets for my four children and find they always give perfect satisfaction. I buy from the manufacturer or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

**War and Live Stock**

In the area of the fiercest fighting the density of the cattle population is the greatest on earth. It is to be surmised that the same is true of its live stock. Northeastern France must suffer heavily. While in Germany and Austria, the cattle are fat and full, enough feed is produced to sustain the live stock, and if imports are cut off there is only one recourse—send the cattle to market. This is what is being done is evidenced by the boast that meat is comparatively cheap in Germany. Scarcity and high price of feed went with the cattle by rail for a season. But after that, must come the day of reckoning. Switzerland has a large live stock and a day of liquidation, but it is a slow and expensive matter to build up a herd of cattle, even if the breeding stock is obtainable.—Wall Street Journal.

The Oil of the People. Many oils have been given to Dr. Chase's Kidney-Liver Oil to enhance its position and increase its sphere of usefulness each year. Its sterling qualities are known to all, but it has kept it here, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

"What a wonderful painter Rubens was," remarked Mr. Gibbs at gallary.

"Yes," assented Mrs. Gibbs. "It's said of him that he could change a landscape into a sad one by a single stroke."

"Why," spoke up Willie, in disgust, "my schoolmaster can do that."

"Waiter, is this real?"

"Yes, sir."

"Well, I'll bet he gave his family a lot of trouble. He certainly was a young tough."

## Was Troubled for Years With Kidney Disease

**And This Treatment Cured Me—This Statement Endorsed By a Baptist Minister.**

The great majority of people are complicated cases which defy the action of any ordinary medicine.

Mr. W. H. Moore, Brockville, Ont., writes:—"I used Dr. Chase's Kidney-Liver Pills, and firmly believe there is no better medicine for kidney trouble. I was troubled for years with kidney disease, and this treatment has cured me completely. The use of these pills I could only walk from the bed to the chair. Now I can go to the field and work like any other man. Dr. Chase's Kidney-Liver Pill are the best medicine."

The case described above was an extreme one, and the writer was in a very bad condition when he began the use of these pills.

Mr. MOSIER, of Muskogee, Okla., states that Dr. Chase's pastor did not hesitate to voice his statement that these pills were the action on the liver, kidneys and bowels. Dr. Chase's Kidney-Liver Pill cure in [Co.] Limited, Toronto.

Plaster, which by absorption through the skin, draws out all congestion, excretive and rheumatic. This is turned over year after year, and the pan or hard surface of the subsoil remains under the soil constantly, and admitted neither to the air nor sunlight, both of which so materially assist in its decomposition, and in preparing the soil for the next crop.

There are few soils that are not benefited by breaking the pan and stirring in a deep, damp cultivation, and the subsoil to the surface. On farm land (excepting, of course, those isolated spots) 50 cent flat iron is a sure way to keep the soil in condition, and cure a host of minor ills that arise in every household.

All dealers sell Nervline, or direct from the Caduceus Co., Kingston, Canada.

**War's Effect on Farming**

Farming was looking up before the war, but that great event has done far more to merely accentuate the previous movement than to profit within the comprise town of folks, to whom "the land question was a burning issue." He was greatly attacking, during the national importance of increasing our homegrown supply of food. The impression would be greater, if the church were not so little understood.

"Well, yes," was the answer, "you can tell that if you want to." said the primate, in sweet and musical tones: "all I have to say is that Mr. X— has much to thank for!"

**The Army of Constipation**

Is Growing Smaller Every Day.

 The average man of the names of the new Greek ministers may prove interesting to the public, as they reveal a good deal. Until after the War of Liberation a century ago few of the Greek population had surnames of the English type, and these were patronymics by various methods, but generally by adopting the name of their ancestors who have added the term "son" or "daughter" or "brother" or "sister" equivalent to our English "son." Most Greek surnames summarize the family history.—London Chronicle.

### Suffered For More Than Two Years

THEN JOSEPH GAGNE FOUND A CURE IN DODD'S KIDNEY PILLS

Quebec Man Took His Wife's Advice And Now Enjoying a New Lease of Health

St. MARYS, Ont.—(Special)—A man is well enough to grow crops. If we could tell the story of his life, we would know the other side to the picture, where the advantages in producing more.

In New Brunswick farmers are sending their produce to thirty-five cents a barrel. In Montreal the consumers are paying their grocer one dollar and eighty cents a barrel for flour, and the consumer is paying five times what the New Brunswick producer receives. Can such a state of affairs continue?

There is a world of difference between living and making a living. Many make a splendid living but never seem to get along in the new post-war world.

They come to regard the making of a living as the first object of living. They get along, try to turn out of life all those who regard the accumulation of material necessities as of importance only in so far as it enables them to enjoy life.—Farm and Dairy.

Dodd's Kidney Pill make their users enthusiastic because not only do they cure all ailments almost at once but they spread good health over the body. They do this by curing the kidneys. Cured kidneys strain all that means pure blood and new health all over the body.

"Madam," said the tattered and torn supplicant to the benevolent lady who answered his timid rap at the door, "have any old clothes you can spare for some unfortunate victim of the European war?"

"I think I have my poor man but don't know if he is still alive. You can not have been in this war, surely."

"No, madam," humbly replied the afferior: "but my wife has sent all my clothes to the Belgians."—Harrisburg Times.

Madam's Liniment Co. Limited.

I was very sick with Quinsy and thought I would strangle. I used MINARD'S LINIMENT and it cured me at once. I am never without it now.

### Cultivation

**Few Soils That Are Not Benefited by Deep Cultivation**

On many farms the depth of the cultivation, such as frequent plowing, is not sufficient, and the result is that the soil is turned over year after year, and the pan or hard surface of the subsoil remains under the soil constantly, and admitted neither to the air nor sunlight, both of which so materially assist in its decomposition, and in preparing the soil for the next crop.

There are few soils that are not benefited by breaking the pan and stirring in a deep, damp cultivation, and the subsoil to the surface. On farm land (excepting, of course, those isolated spots) 50 cent flat iron is a sure way to keep the soil in condition, and cure a host of minor ills that arise in every household.

All dealers sell Nervline, or direct from the Caduceus Co., Kingston, Canada.

**The Care of Shade Trees**

Although, of course, nineteen-twentieths of the publications issued by the Department of Agriculture are directed to the needs of the farmer, there is much that can be of great value to the gardener, especially in the selection of shade trees, their planting, transplanting and care; their pruning, and notes on the principal diseases and undesirable conditions to which shade trees are subjected, especially in southern Ontario.

A noteworthy bulletin of this description is No. 1, dealing with "The Care of Shade Trees" written by F. E. Buck, B.S.A., assistant to the Dominion horticulturist. It is an authoritative handbook on the subject, containing valuable advice in the selection of shade trees, their planting, transplanting and care; their pruning, and notes on the principal diseases and undesirable conditions to which shade trees are subjected, especially in southern Ontario.

It is available at 25 cents a copy.

**For Protection**

against the serious sickness so liable to follow an ailment of the digestive organs—biliousness or inactive bowels, you can rely

## Weak Women!

Some women are weak because of ills that are common

### In Girlhood—Womanhood and Motherhood

The prescription which Dr. R. V. Pierce used most successfully—in diseases of women—which has stood the test of nearly half a century—is

### Dr. Pierce's Favorite Prescription

Take this in liquid or tablet form as a tonic.

Mrs. Kate D. Richardson, of Beaufort, Essex Co., Va., says, "I esteem it a pleasure to take Dr. Pierce's Pleasant Pellets. For some weeks I suffered greatly with weakness. I was treated by several physicians but nothing helped. Then I heard of Dr. Pierce's Pleasant Pellets. I went to the drug store and got a bottle, and after I took them with water, I felt better. I never knew what was wrong with me for so long a time, and I have made others as well unhappy. So you see what a debt I owe you!"

**Dr. Pierce's Pleasant Pellets regulate stomach, liver, bowels**

### Poultry in Manitoba

The poultry industry of Manitoba is growing. In 1914 the farmers of that province sold \$16,850 chickens at canaries, and 77,000 chickens at pullets. In 1914 they sold 184,236 turkeys and 81,720 geese as compared with 176,000 turkeys and 79,940 geese in 1913. But where are the ducks? No reports have been given.

**Minard's Liniment, Lumberman's Friend.**

Every time Billinger goes in bath he gets cramps. He should think it would worry his wife.

"It does," she fed him all sorts. She made bathing suit for him and declared he must wear it every time he goes in."

"And now he won't go near the water."

### For Protection

against the serious sickness so liable to follow an ailment of the digestive organs—biliousness or inactive bowels, you can rely on the best known corrective.

### Beecham's Pills

**The Largest Sale of Any Medicine in the World**

**Gasoline Wanted for Wall Street**

## Local and General

Attention is called to the changes in the local train service, which will come into effect on Sunday, May 30th.

Capt. Wigle has got a road crew to work, and our friend V. Fisher is going out as cook. Oh, you prunes.

The front street is soft again and more coal and wood is being hauled as usual.

The City Barber has removed his place of abode, and is now located over the Pool Hall.

Order your Vegetable, Lawn and House Plants at W. McRory and Sons.

The Crossfield School will again this year be a centre used for the Departmental Examinations for Grades VIII to XI, to commence on Monday, June 21st.

The Rev. C. H. Huestis, Field Secretary of the Lord's Day Alliance, will preach at Rodney, Tan-y-Bryn and Crossfield, on Sunday, May 30.

Mrs. J. Robertson returned on Wednesday from Edmonton, where she had been for a few days to see her son who is being educated there.

Victoria Day passed off in a very quiet manner around Crossfield, the weather being, no doubt responsible in a way. In the afternoon a baseball game should have been played between Floral and Crossfield, but it had to be abandoned owing to the rain. The score standing at 10 in favour of Crossfield.

The local Fire Eaters Football Team turned out in the evening on Victoria Day for the first time, having as opponents a scratch team from Inverlea; the rain was quite a drawback, or the crowd of spectators would, no doubt, have been much larger. However, the few that were there enjoyed quite a treat. The local team were out to win having on for the occasion a new football outfit, composed of blue shirts, white knickers and stockings to match. The game was all the way through in favour of the home team, the score being at the close 5-0.

"We have private funds to loan at the present time. If you are looking for a loan, send full particulars to D. P. Hays, Cartwrights, Alberta." 4-17

Mr. and Mrs. J. Kendrick, of Calgary, were visitors at the home of Mr. and Mrs. J. S. Jose, over the week end. Mrs. Kendrick, who by the way, is Mrs. Jose's sister will stay in town for a week or more.

Miss M. Neil, of Montreal, sister to K. C. Neil, formerly of Crossfield, was a visitor with the Gilchrist's last week end. Kenneth also spending Saturday in town.

We wish to call the attention of farmers and others to the advertisement on the back page setting forth requirements of the Government for horses. Heavy Draft Horses, Riding Horses and Artillery Horses are wanted. If those who have animals to dispose of will read carefully and see that they can fulfil the conditions required, it may save them from disappointment and loss of time.

Farmers Insure Your Buildings in the Wawanesa Mutual Fire Insurance Co. A Company of the Farmers and for the Farmers only. Costs only about 35 cents a year for \$100 insurance.

Chas. Hultgren, Agent.

WHAT DO YOU THINK OF THE MAN WHO DRAWS HIS PAY IN ONE TOWN AND SPENDS IT IN ANOTHER?

## Condolence.

**Resolved:** That the Crossfield and District Agricultural Association desire to express to Mrs. Russell Boyle their deep sympathy and sincere condolence upon the irreparable loss she has sustained in the death of her husband Lieut.-Col. Boyle, who fell gallantly fighting for the Empire at the head of his battalion in Belgium.

## Fair Notes.

The Board met on Saturday last and adopted a race programme for this year. Some economy was practised, as it was their opinion that some retrenchment should be made owing to existing conditions.

The Government Grant for 1914 amounted to \$1,215.00. Your entry this year will help to make up \$1,500 or better. Let the Secretary have it.

It is the intention of the management to whitewash all the buildings on the grounds providing it can be done by volunteer labor. Will you help?

Every little bit helps. So don't turn down the man with the subscription list when it is presented.

**It isn't a matter of buying silks and bric-a-brac... What keeps the Canadian factory going nowadays is the main part of what you buy every day, and the small items multiplied run into a larger total than the big purchase**

## CANADIAN DOLLARS NEEDED AT HOME

Everybody Can Help—Where the Wholesaler Comes in—The General Welfare of Canada

Keeping the Canadian dollar at home is very much a matter of the wholesale dealer who buys in carloads. No matter what retailers and individual consumers may decide to do as a national self-interest campaign, the jobber is the man who very often controls the situation. The wholesale dealer has a wide-angle vision. He has customers far and wide; not in one province, but in many. His parish is often as large as that of the manufacturer. His business has a national scope. To the wholesaler the general welfare of Canada is of more direct importance than is to the retailer of the individual.

Naturally this country looks to the wholesaler to help along the "Made-in-Canada" movement, because it is going to be his best interest to offer the retailer the goods his customers are demanding, and in his position of holding in carload lots he can do a greater deal to help or hinder people in carrying out the "Made-in-Canada" sentiment.

The wholesaler who buys his goods from a foreign country is letting the reservoir leak without pumping it up. Every carload of goods bought outside of Canada means the value of a carload taken away from the purchasing power of the Canadian people, which depends directly on the business done by Canadian factories quite as much as on the proceeds of Canadian farms and mines and factories.

We all realize the insanity of killing the goose that lays the golden egg. The golden egg in this case is the ability of the Canadian people to buy goods, and the ability of the Canadian manufacturer to supply them, as well if not better, as cheaply as any other nation now competing for business.

## A FOREMOST DUTY OF CITY FATHERS

Practical Suggestions For Every Municipality—Must Help to Keep Labor Busy

The Kingston "Standard" a few weeks ago advanced the suggestions that every city and town hall should have a bureau to encourage "Made-in-Canada" goods. Developing the idea the editor pointed out that money spent by public officers for the good of the public should serve the good of the public by being invested in what makes work for Canadians. There are areas in this country of councils and boards of commissioners buying down Canadian tenders, even when they were lower than foreign tenders; or because they were a few dollars higher; or because they want to try experiments; or because they figured that the factories which paid taxes into their own civic treasury could afford to beat up business abroad. Happily, such cases are now not so frequent as they used to be. The civic employers and spenders of Canada as a whole, have got strongly into their heads that it's far more important to have labor buy in factories and able to spend wages for "Made-in-Canada" goods, than to have labor tramping the streets looking for charity or work. It is better to have men buy busyness something the representation of an investment of 1,000,000 worth of work that is done by a corporation just on purpose to keep men from being idle.

A skilled mechanic may be able to handle a shovel on a piece of road work. But he won't do it as well as the man that's brought up on the shovel. His power to work depends on the thing he does. When he's at a task that does not suit him he wastes his labor. The civic government that does not help to keep labor busy in its own factories, or factories elsewhere in Canada, is neglecting a golden opportunity to help along a movement that keeps civic governments from having bad economic problems on their hands. Every municipal government in Canada should be a civic headquarters for the purpose of "Made-in-Canada" goods.

## THE MAN THAT HAS A MADE-IN-CANADA SALARY SHOULD HAVE MADE-IN-CANADA TASTES

New Light on a Live Question—Everybody Can Help

Thousands of tons of Canadian nickel are at the present time in the armor-plated German warships, as well as of British and French and Austrian and Russian. From our mines near Copper Cliff, Ont., we have shipped out this nickel to the United States in a crude form to be refined and reshipped by American companies to the markets of the world. Up till the past couple of months nobody could have raised any objection to this as a matter of business... Canada had a concern on a very useful article. She sold it to the world.

But at the present time there is not an ounce of nickel-pile in any German armament on the Kiel canal or at Essen or anywhere else that Canadians would not gladly take back and pay the same price to keep it in this country, until the war is over. That's practical patriotism just as selling the nickel abroad was practical business.

If we are as sensible over the nickel sold to the enemy in times of peace, let us be as sensible and vigorously concerned about the nickels and the dollars we have been sending out of this country to buy things made by foreign labor, paying foreign dividends for the sake of foreign homes. If we Canadians are really in earnest we can repair all damage resulting from the export of our nickel to Germany by refusing to spend our money for foreign-made goods. We can't get back this nickel. But we can stop the nickels and the dimes and the dollars from going abroad after the nickel. If this is a matter of business we help the enemy in a time of war by keeping our own money in this country to keep Canada prosperous.

## HOW THE WOMEN ARE GIVING HELP

A Matter of Intuition—Sustain the Pay Roll by Purchasing "Made-in-Canada" Goods

What are the women of Canada doing about the "Made-in-Canada" movement? As usual, more than meets the eye. There never was a good movement without women in it somewhere. When the women of Canada undertake to put their sanction on the campaign that means prosperity to their husbands, sons and brothers, the success of that campaign is certain. In this case that peculiar quality of women known as intuition, counts for more than all the logic of well-constructed arguments. Women are natural economists—as well as instinctive spenders. When they endorse a policy of buying goods made by Canadians for the sake of

Canadian homes, they do it as a matter of plain instinct. You don't have to reason to a woman that it's her duty to support her own cause before anybody else's. She takes it for granted.

All this movement needed to carry it with flying colors to the winning-post of national prosperity was the intuitive backing of the intelligent womanhood of Canada. To them it's as obvious as the smile that wins an opponent, or the tears that conquer an enemy. A woman in Canada who doesn't stand behind this campaign to boost Canadian prosperity, Any more man who feels doubtful or lukewarm about it has better introduce the subject to his wife. One gleam of her intuitive perception will be a match for all his lame and limping arguments to the contrary. This is no cause that divides families. Buying "Made-in-Canada" goods at a time like this is the one cause that unites both families and communities.

## Lodge Cards

## CROSSFIELD LODGE I. O. O. F.

No. 42  
Meets Every Wednesday Night in the Oddfellows Hall at 8 p.m.  
Visiting Brethren Welcome.

A. JESSIMAN, A. W. GORDON,  
Fin. Sec'y. Rec. Sec'y.

## Council Meetings

The council of the Village of Crossfield will meet in the Council Chamber over Fire Hall on the first Monday of each month, commencing with the hour of 8 o'clock p.m.

By Order of the Village Council

5-52-4 W. McRory, Sec.-Treas.

## Tom Wood Jr.

Will Stand for the Season 1915, at Crossfield.

Terms: Ten Dollars for the Season, with a return privilege, or \$15 to insure; \$5 down and the remainder when the mare proves infertile.

Hugh McBean.

## PLANTS

All Ready for Your GARDEN.

Cabbage, Cauliflower, Celery, Pansy, Aster, Petunia, &c.

Our List includes all the best varieties of Choice Garden Plants for Alberta's climate.

Write for our Price List.

## A. M. TERRILL LIMITED

FLORISTS,

CALGARY, Alberta.

## Seed Grain for Sale.

For Sale—Marquis Seed Wheat, uncleaned.—West Circle N Ranch, Banner School.

G. A. C. DOUGAN.

## The Merchant and Farmer

### Why the Farmers and the Country Merchants Must Get Together

In many places the chief problem of the country merchant and farmer is how they can get away from the domination of the local merchant, how they can buy co-operatively for cash and save on costs. They can do it cooperatively and thus force the local merchant to a higher price or get it otherwise. They forget to take into account that if they can't buy one or two articles co-operatively, they buy for cash, taking just so much business away from the local merchant and leaving him to carry them for an equal amount.

While this is going on, the travelling merchant, the carter, the travelling master that co-operative buying is cutting down his trade and making it a credit business; that now the carter has to go to the grain fields if they can't sell direct; that the corn coming to the grain dealer is sold at the edge delivered to his store or stores. The local merchant does not buy co-operatively because the average co-operative company is seldom incorporated, and since it is almost never incorporated, hence its financial responsibility is limited.

You ask why they do not get together? The answer is simple, the fact remains that they seldom do.

"They" "cuss" and discuss one another at the meetings, when the men get together, a frank open discussion of grievances (for both the farmer and the merchant) have a decided effect. They have a new viewpoint, a new basis for future relations which should bring them greater profit to both.

A town of less than 10,000 in our great middle west owes its very existence to the farms surrounding it. The farms surrounding it are forced to trade, practically every store would be forced out of business and in a few years the town would pass out of existence. It is a very simple fact that the merchant realizes this dependence he usually chooses to ignore it. If all of the village stores were to close, and the town was cut off from the farmer, who would lack a place to buy and sell? He would buy at a higher price and sell at a lower. The farmer would become a less desirable place to live, realty values would fall and the farmer would be the loser. Small town and country merchants, if they will ever help the one should help the other.

The prosperity of the average American village is in direct proportion to the prosperity of the farmers surrounding it. Can the local merchant claim him as a customer more than in inducing farm prosperity by promoting general community welfare? He can find a better market for more products, and by encouraging new factories he can secure lectures, corn shows, agricultural fairs, agricultural goods, and other like features while saving time, labor, and greater farm profits. He can keep himself better informed of the latest news and add a new money-making value to the farmer. He could take on the function of a hardware and farm products to his own advantage and to the benefit of the farmer. The farmer has a man's task in caring for the production end. He does not care for the distribution organization. He is glad to give a fair commission for services rendered, but because no one has been found who can take care of his business, he has been forced to form co-operative organizations.

Some time ago we have seen the light. Out in lower country have formed a board of trade which is made up of farmers and merchants who are interested in the same field. A few papers are on the table and the merchant reads the agricultural papers, etc., with interest. Hundreds of town hold fairs, agricultural schools and corn shows.

The co-operation is barely started. It needs impetus. Not matter what your line of work, it will pay you to help him. In the same way, he has been forced for the small town and country boy. It will help to keep down great concentration in centers of population, thus reducing the cost of living. This will go far toward making us a nation of more healthy suburban dwellers. It will place the economic dependence of the country upon agriculture, where it rightly belongs. It will provide a greater farm output, and as a result, we will keep more men employed. It will solve the farm problem. It will make co-operative buying and selling units of production, and make corporation line and make town and country the countryside. —City Ashe in the Breeders' Gazette.

### The Cost of War

The staggering money cost of modern naval warfare is indicated in some figures by the twenty-nine Drednaughts now in commission in the British navy. When sent on an eight-year tour of the world, it is estimated that they would consume 4,320 tons of fuel, running up a bill of some \$15,000. If we had a Drednaught base, and a fleet of eight ships were ordered to steam at full speed for twenty-four hours and to fire each gun and each torpedo, the cost of fuel for the nation would be approximately \$1,000,000, allowing nothing for the depreciation of material.

**Cassey**—They say Murphy is dead. He was afraid to leave an afternoons. Murphy is dead, but still she'll miss his cowid while in the marin now.—Town Topics.

## The Wastage of Horses

### Loss of Horses Through the War Will Create an Enormous Demand

The ordinary life of a good healthy horse rarely exceeds from twelve to fifteen years, but when he goes to war it is shortened to an average of seven days. Artillery horses last in military service from four and one-half to six years, the average of each animal. The war has already been going on around two hundred and twenty days. From the number of horses employed at two hundred thousand, this would indicate that already upwards of three thousand horses have been lost. It is also calculated by so eminent an authority as Lord Kitchener, that the war will last three years or 870 days. The number of horses lost through destruction, would mean the wastage of nearly twelve million more horses. In the mean time, the demand for horses can proceed to the same extent as in normal times. What a tremendous shortage of horses can be created by such a loss! With cessation of breeding included it would be reckoned that the deficit will be even greater. The demand for horses, as far as the market is concerned, may be that there will be a demand in the next few years of from twenty to twenty-two million more horses than are now in existence.

Whether the millennium sets in, as some people profess to think is likely, or whether the world can go on as it is, the motor power has done wonders in hauling and in aiding the quick movement of troops, supplies, etc., and has largely nullified the use of the horse. Modern war is carried out on such a gigantic scale that the increase in the locomotion required have multiplied many fold.

Thus, for military purposes at least, motor power can never

replace the horse, but the demand for the animal can only be immensely increased. Thus countries with breeding facilities will be compelled to supply large numbers. To take steps now in preparation for eventualities as well as to triple gangploughs, set eight teams to each plough, and to plant acres a day. Seeding is now in progress with a force of 130 head of horses and mules, together with teams of 20 and 22 h.p. respectively.

Last year, when fields and prairie on all sides of the North West were covered with snow, the company sent a large amount of Marquis wheat on this farm yielded twenty-four bushels to the acre, and oats were fifty-five bushels to the acre. This year, however, the yield of oats was only forty bushels to the acre of oats looked for. In 1913, the average on 2,830 acres was 100 bushels to the acre. In the same year produced sixty-one and a half bushels to the acre on 462 acres, when on 306 acres of oats were harvested 100 bushels. The yield of oats looked for and a half bushels to the acre. The grain crop in 1913 totalled 32,200 bushels, and the grain crop for 1914, 60,000 bushels, one measuring 100x18 feet, loaded to their capacity.

There are a number of things responsible for the poor crop of 1914, under the supervision of Charles Sherwood Noble. He is a worker himself and controls his workers. He is a man who knows where every dollar goes, and what it does. A piece of summer fallow looks as good to him as any other field. He uses a plucker and a scythe harrow after the plow, and if the land should drift, he gets to work and makes the lumps larger. His force is always out with the last drops of rain to gather up the moisture, every bit of moisture is conserved.

Clean seed is a touchy spot, with this writer recently, Mr. Noble said:

"We are continuing to make a specialty of clean farm seeds and by this we mean to speak in a fair way of disposing of our entire oat crop of 47,000 bushels to the market at prices ranging from

\$15.00 to \$17.00 per bushel.

On Sept. 29th, the company had 59 cars of grain on the way to Fort William, Ontario, and 100 bushels to the acre, 60,000 bushels, one measuring 100x18 feet, loaded to their capacity.

His force is always out with the last drops of rain to gather up the moisture, every bit of moisture is conserved.

Clean seed is a touchy spot, with this writer recently, Mr. Noble said:

"We are continuing to make a specialty of clean farm seeds and by this we mean to speak in a fair way of disposing of our entire oat crop of 47,000 bushels to the market at prices ranging from

\$15.00 to \$17.00 per bushel.

On Sept. 29th, the company had 59 cars of grain on the way to Fort William, Ontario, and 100 bushels to the acre, 60,000 bushels, one measuring 100x18 feet, loaded to their capacity.

There are a number of things responsible for the poor crop of 1914, under the supervision of Charles Sherwood Noble. He is a worker himself and controls his workers. He is a man who knows where every dollar goes, and what it does. A piece of summer fallow looks as good to him as any other field. He uses a plucker and a scythe harrow after the plow, and if the land should drift, he gets to work and makes the lumps larger. His force is always out with the last drops of rain to gather up the moisture, every bit of moisture is conserved.

Clean seed is a touchy spot, with this writer recently, Mr. Noble said:

"We are continuing to make a specialty of clean farm seeds and by this we mean

## Advantages of Farm Life

Professor Bedford Conducting a Campaign on "Back to the Land". Prof. W. G. Bedford, M.A., Ph.D., a deputy minister of agriculture, delivered a lecture on the back-to-the-land movement in Winnipeg recently.

The Advantages of Farm Life and Selecting a Farm. He drew attention to the fact that during the past decade many had left the city for the city. He thought it probable that the tide was now setting in the opposite direction, and many would leave the city for the farm.

Life on the farm is a healthy life, a safe life for the family. The farmer is an amateur, but he is an agriculturist affected by hard times to the extent the city dweller is. He has more time but not much to spend, but if industries will have a sufficient amount of work, many would leave the city for the farm.

Life on the farm is a healthy life, a safe life for the family. The farmer is an amateur, but he is an agriculturist affected by hard times to the extent the city dweller is. He has more time but not much to spend, but if industries will have a sufficient amount of work, many would leave the city for the farm.

Land in the province of Manitoba is increasing in value for many years to come. Then what work a man does can be householded he does for himself and a reasonable return.

The value of agriculture increased rapidly, increasing and there was a time in history when the products were brighter than the sun.

Professor Bedford, however, warned of the fact that there are 30,000 free homesteads yet available in Manitoba, and the land west of the Red River, Lake of the Woods and Lake Winnipeg, and northwest of Lake Manitoba was, for the most part, yet to be settled.

He urged the advantages to the mixed farmer, well-educated, well-motivated, with rich soil, it could be made extremely successful.

The lecture was illustrated by stereoscopic pictures of typical farm animals.

## A Good Medicine For the Spring

Do Not Use Harsh Purgatives—A Tonic is All You Need

Not exactly sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite flickers sometimes here and there, a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any doctor will tell you that the blood is out of order that the indoor life of winter has left its mark upon you, and may easily depress your spirits.

Do not dose yourself with purgatives, as to many people do, for the hope that they will be cured. The purgative drugs gather through the system and weaken instead of giving strength. Any doctor will tell you that a tonic that will make new blood and build up the nerves. Dr. Williams' Pills is the best medicine.

Each tablet is one-half grain and surely. Every dose of this medicine makes new blood which clears the skin, strengthens the muscles, depresses men, women and children bright, active and strong.

Mrs. S. E. Stephen, Poulika, Alta., says: "I suffered from a sore throat, aches and was bad down in my head and was bad down in my head and was bad down in my head. I had tried several remedies with little success."

Dr. William's Pink Pills, and I can recommend them with confidence to all weak women."

What can we do? You will see, many asked a police clerk.

"King you find out if Jim Jones was married?"

One of the records disclosed the name of James Jones, for whose marriage a license had been issued two years before.

Elizabeth Mott, didn't he?" asked the woman.

The license was issued for a marriage, white young man, I'm Elizabeth. I thought I oughter come in an' tell ye that Jim is escaled."

Lady Visitor—That's a badly wounded soldier—what are you going to do with him?

Ordinary—Oh, he's goin' back again to the front.

Lady Visitor—Good heavens—what have you done?

Ordinary—E thinks he knows who done it—London Opinion.

Her Ruling Passion  
"She intended to refuse him, but she is such a lover of bargains that she could not."

"How was that?"

"He looked so cheap when she turned him down that she snapped him up."

Careful Doctor  
Prescribed Choice of Food Instead of Drugs

It takes considerable courage for a doctor to deliberately prescribe only food for desirous patients instead of resorting to the usual list of medicines.

Some truly scientific physicians recognize and treat conditions as they are and should be treated. Here's an instance:

Four years ago I was taken with severe gastritis and nothing would stay on my stomach, so that I was on the verge of starvation.

One day a doctor who had a summer cottage near me—a specialist—and a low horse, sent for him.

"He advised me to try a small quantity of Grape-Nuts at first, then as my stomach became stronger to eat more."

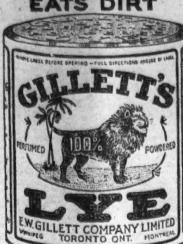

"Now, after a year on Grape-Nuts I was able to eat the food I used to have color in my face, memory became clear, where before everything seemed a blank. My limbs got strong and could walk. So I steadily recovered."

"Now, after a year on Grape-Nuts I was able to eat the food I used to have color in my face, memory became clear, where before everything seemed a blank. My limbs got strong and could walk. So I steadily recovered."

"I hear that they belong to the early settlers."

"Well, you wouldn't think so if you could see the hill collectors climbing their front steps."

## GILLETTS LYE EATS DIRT

## Raising Heifer Calves

Striking Example of the Utility of Keeping Dairy Records

The record of two herds of dairy cows kept by two Ontario farmers is a striking example of the utility of dairy records to the man who really wants to buy a herd. One herd has been tested for four years and has selected his cows carefully, studying their various preferences and giving preference to the best individuals. He raises heifers from his best cows; four two-year-olds gave last year an average of 7,114 pounds of milk, and a herd of 100 cows gave an average of 8,059 pounds of milk, and 255 pounds of fat.

The other herd is simple. It started with just two cows but he does not raise any calves. Last year his nine cows, all upwards of six years old, gave an average of 5,100 pounds of milk, and a herd of 100 cows gave an average of only 4,240 pounds of milk. This is just about one-half as much per cow as in the first herd. The man who has the best herd, however, less than the average of the four heifers in the first herd. He has had a good herd, but unless it is his judgment in "picking a winner," which judgment, by the way, does not necessarily mean that the owner of the first herd has the advantage of four years of dairy records practically indispensable in making a purchase, because his knowledge in handling cows to better advantage. Cow testing pays.

Keep Minard's Liniment in the house.

One day a tall, gaunt woman, with rags colored hair and an expression of great fierceness, strode into the office of a country clerk in West Virginia. She was a sly, artful person who keeps the marriage books, since her

demanded.

What do you do, Jim?" she said, asking him.

"King you find out if Jim Jones was married?"

One of the records disclosed the name of James Jones, for whose marriage a license had been issued two years before.

Elizabeth Mott, didn't he?" asked the woman.

The license was issued for a marriage, white young man, I'm Elizabeth. I thought I oughter come in an' tell ye that Jim is escaled."

Lady Visitor—That's a badly wounded soldier—what are you going to do with him?

Ordinary—Oh, he's goin' back again to the front.

Lady Visitor—Good heavens—what have you done?

Ordinary—E thinks he knows who done it—London Opinion.

Her Ruling Passion

"She intended to refuse him, but she is such a lover of bargains that she could not."

"How was that?"

"He looked so cheap when she turned him down that she snapped him up."

## The Best Seed

Varieties of Grain For the Prairie Provinces

Dr. Charles E. Sander, Entomologist, recommends the following varieties of grain for the Prairie Provinces:

Sowing wheat: Red Fife best in dry areas, but Marquis where rainfall is sufficient; for earliness and longer straw, Huron and Early Red Fife are suitable. Marquis is the best general favor for earliness, and when the tendency is towards excessively long ears, the districts where Marquis is needed, Marquis probably give satisfaction.

Oats: Marquis and Ligon. Dark oats, either straight or the common commercial sort, Orloff, if extreme earliness is required, provided the climate is not extra cold.

Harrow, Manchurian and Ontario Agriculture College No. 21, six-rowed oats, varieties: Canadian Thorpe, Buckwheat and English Grey, if to be cut green and ground.

Pear—Articul, earliest ripening: Prussian Blue, Golden Vine, Chancellor and English Grey, if to be cut green and ground.

Milk: Women doctors never fail.

They immediately attack the worms and expel them from the system.

They are complete in themselves, not only as a worm destroyer, but as a highly nutritious food, containing all the constituents necessary for health, and in addition, rectifying weak digestion and restoring the debilitated system to healthfulness, which is the growth of the child will be retarded and its constitution weakened.

Rifle Range in London Park

Coutts Employees Practice Firing Among Old Lagers

One of the quaintest of the new rifle ranges with which London has been recently furnished is that situated in the top of the old lager houses in the Strand. A long room devoted to the storage of the ledgers of a hundred years old, with windows and arched doorways, which side in tiered rows, has been transformed into a most useful range, where Coutts young men practice rifle firing of an evening.

\$100 REWARD, \$100

The readers of this paper will be pleased to learn that the disease that science has long known to exist is called "Cancer." Hall's Cancer Cure is the only positive cure now known to exist. Dr. Oliver Cope, of Philadelphia, in his Constitutional Disease, requires a constitutional treatment, which consists in taking internally, acting directly upon the body, the various substances of the system, thereby destroying the foundations of the disease and giving the patient strength and a positive匡titude, and assisting nature in doing its work. His curative powers that they are not to be denied. Send for list of cases.

Address: F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, the Half Family Pill for consumption.

Getting Monotonous

Little John was full of mischief and during his first year at school hardly a day passed but he was sent to the master in the corner.

When the school house burned down and a new one was built across the street, John ran over to his father, who was county superintendent.

"Well, son, what's the trouble?"

"I'm getting tired of corsets."

Minard's Liniment used by Physicians.

Canada's Commercial Schools

Canada is finding her rural schools profitable for advancing knowledge of agriculture among children of the country. The first school was an innovation less than a decade ago but in 1914 there were 148 of them held in Ontario, covering approximately all the rural schools of the province. Pupils entered in these fairs numbered 75,000, and in the commercial line, 10,000 of them were worked by the children. It is said the influence is beneficial in farm work and Buffalo Commercial.

You Astral, Too.—The officer of Dr. Kellogg's Astral Institute is not much surprised that it is to be expected. It never fails to bring relief, and in your case it will do the same.

So universal has been the success of this far-famed cure that one afflicted with this disease owes it to himself to try it.

"Dad, why do they call a man who eats only vegetarians, son?"

"And one who eats people?"

"A humanitarian. Now run along and play."

In order that the world in general and neutral countries in particular, something like the work of the French army, the French war is organizing an expedition of cinematograph operators throughout the world.

Many remarkable films already have been taken, and are already being exhibited. The demand for German war films in the United States and other neutral countries proves the great interest of the public. Cinematographic reproductions of war.

"Do you suppose we shall ever have universal peace?"

"Hardly. I fancy marriage will never be entirely abolished."

She—Would you leave your home for me?

He—To leave a baseball game in the ninth inning when the score was a tie.

## WOMAN IN TERRIBLE STATE

Finds Help in Lydia E. Pinkham's Vegetable Compound.

Cape Wolfe, Canada.—"Last March I was a complete wreck. I had given up hope of getting better, but during the month of April I began to improve."

"I took Lydia E. Pinkham's Vegetable Compound, and I am in good health and have a pair of twins boys two months old and growing well. I am surprised doctors and neighbors for them all know what a wreck I was."

"Now I am healthy, happy and, and owe it all to Lydia E. Pinkham's remedies. You may publish this letter if you like. I think if more women took Lydia E. Pinkham's Vegetable Compound, they would recover faster and have better health!"—Mrs. J. T. Cook, Lot No. 7, Cape Wolfe, P.E.I., Canada.

Because your case is a difficult one, and doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It has already removed many cases of female ills, such as inflammation, ulceration, displacements, tumors, irregularities, periodic pains, backache, and it may be exactly what you need.

The Pinkham record is a proud and peerless one. It is a record of constant victory over the most difficult cases of human infirmity.

"She has removed all sorts of ills—ills that did out despair. It is an established fact that Lydia E. Pinkham's Vegetable Compound has restored health to thousands of such suffering women.

Why don't you try it if you need such a medicine?

## The New BRAND Act

requires the re-registration of all the Brands in the Province. All persons who registered Brands before December 31st, 1906, will require to have the same re-registered during the present year. Notices are being sent out, but because of changes of address they may not reach some owners of Brands, and all such are requested to communicate with the Recorder of Brands at Medicine Hat at once, giving a description of their Brands and their present address when full information will be sent them with respect to renewal of the same.

H. A. CRAIG,  
Deputy Minister of Agriculture,  
Province of Alberta.

## DEPARTMENT OF MUNICIPAL AFFAIRS

### Notice of Court for Confirmation of Returns of Unpaid Taxes

Notice is hereby given that the Judge of the District Court has appointed Saturday, the 26th day of June, 1915, at 10 o'clock a.m. for the holding of a Court at the Court House in the City of Calgary for the purpose of confirming the Returns made under the provision of Section 91 of The Local Improvement Act, covering the following Local Improvement Districts, viz:

Large Districts Nos. 156, 160, 161, 186, 192, 216, 217, 218, 222, 246, 247, 251, 252, 253.

Small Districts Nos. 158, 159, 160, 190, 191, 220, 221, 271, 281, 309, 312.

Also for confirmation of the Returns of

Unpaid Taxes made under the provisions of Section 19 of the School Assessment Ordinance, and the Return of Treasurers of the following School Districts, viz:

Nos. 79, 84, 85, 128, 166, 183, 229, 230,

232, 403, 409, 423, 471, 476, 559, 581,

582, 598, 610, 697, 718, 756, 762, 794, 811,

829, 900, 961, 986, 1041, 1056, 1068, 1091,

1120, 1121, 1136, 1140, 1172, 1199, 1201,

1203, 1259, 1266, 1283, 1287, 1288, 1303,

1337, 1397, 1421, 1426, 1454, 1460, 1472,

1481, 1482, 1483, 1492, 1497, 1498, 1505,

1603, 1531, 1554, 1581, 1593, 1597, 1634,

1642, 1646, 1647, 1651, 1654, 1655, 1667,

1671, 1674, 1680, 1686, 1708, 1735, 1746,

1758, 1761, 1778, 1783, 1785, 1787, 1792,

1809, 1808, 1825, 1840, 1847, 1951, 1964,

1961, 1971, 2003, 2011, 2015, 2020, 2035,

2060, 2078, 2096, 2098, 2103, 2118, 2133,

2184, 2187, 2216, 2218, 2242, 2252, 2271,

2293, 2303, 2319, 2326, 2386, 2393, 2398,

2401, 2442, 2475, 2486, 2489, 2521, 2563,

2612, 2676, 2683, 2703, 2732, 2772,

Also for confirmation of the Tax En-

forcement Return made under the pro-

visions of Section 11 of The Educational

Tax Act, covering lands located in the

following Districts:-

Nos. 150, 158, 159, 160, 161, 180, 190,

191, 192, 216, 217, 218, 230, 231, 222,

240, 247, 251, 252, 277, 279, 291, 282,

309, 312, as shown on official map pre-

pared by Department of Municipal Af-

fairs.

Dated at Edmonton this 20th day of

April, 1915.

JOHN PERRIE,

Deputy Minister of Municipal Affairs.
